Dear Melanie

## Testimonial

This letter is to confirm that Husqvarna utilises the services of Melanie Rowland and has been for a number of years and has always been satisfied with the results of the treatment delivered to the work-force.

Husqvarna is a Manufacturing, R&D and Sales division based in the NE of England and Melanie provides a wide range of osteopath services to all personnel of the site. During her time with Husqvarna, this service helped in particular the manufacturing division to reduce its work-related absence. This treatment service continues to support the manufacturing division in reducing work-related absence.

I would have no hesitation in recommending Melanie to any other future employer/customer. In my opinion, she is professional, dedicated, hard-working and a pleasure to work with.
